

Quarterly Investor Presentation

Second Quarter 2026

Safe Harbor Statement and Non-GAAP and Forecast Information

This presentation includes “forward-looking statements,” as that term is defined in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of historical facts, included or incorporated in this presentation could be deemed forward-looking statements, particularly statements about the future financial performance of onsemi, including financial guidance for the third quarter of 2026. Forward-looking statements are often characterized by the use of words such as “believes,” “estimates,” “expects,” “projects,” “may,” “will,” “intends,” “plans,” “anticipates,” “should” or similar expressions or by discussions of strategy, plans or intentions. All forward-looking statements in this document are made based on our current expectations, forecasts, estimates and assumptions and involve risks, uncertainties and other factors that could cause results or events to differ materially from those expressed in the forward-looking statements. Certain factors that could affect our future results or events are described under Part I, Item 1A “Risk Factors” in the 2025 Annual Report on Form 10-K filed with the Securities and Exchange Commission (“SEC”) on February 9, 2026 (the “2025 Form 10-K”) and from time to time in our other SEC reports. You are cautioned not to place undue reliance on forward-looking statements. We assume no obligation to update such information, which speaks only as of the date made, except as may be required by law. Investing in our securities involves a high degree of risk and uncertainty, and you should carefully consider the trends, risks and uncertainties described in this document, our 2025 Form 10-K and other reports filed with or furnished to the SEC before making any investment decision with respect to our securities. If any of these trends, risks or uncertainties actually occurs or continues, our business, financial condition or operating results could be materially adversely affected, the trading prices of our securities could decline, and you could lose all or part of your investment. All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by this cautionary statement.

Our earnings release and this presentation include certain non-GAAP financial measures. Reconciliations of these non-GAAP financial measures to the most directly comparable measures under GAAP are included in our earnings release, which is posted separately on our website in the “Investor Relations” section. See Appendix for GAAP to Non-GAAP Reconciliation.

Second Quarter 2026 Financial & Business Update

Q2'26 Highlights

Exceeded the midpoint of guidance for revenue, non-GAAP gross margin and EPS

Announced agreement to acquire Synaptics, adding connected compute capabilities at accretive gross margins

Year-over-year non-GAAP EPS growth outpaces revenue growth by 4x

Raised AI data center outlook: Revenue expected to more than double in 2026

Q2 Free Cash Flow increased by 3x year-over-year to approximately 27% of revenue

Returned 105% of YTD free cash flow to shareholders through share repurchases

Q2'26 Non-GAAP Financial Performance

Strategic Announcements

onsemi Announces agreement to acquire Synaptics, adding connected compute capabilities at accretive gross margins

onsemi Announces Issuance of Private Offering of \$1.3 Billion of 0% Convertible Senior Notes

onsemi Introduces GaNEXUS Gallium Nitride Power Portfolio

Q3'26 Guidance Highlights

Revenue

GAAP:
\$1,650 to \$1,750m

Non-GAAP:
\$1,650 to \$1,750m

GM

GAAP:
39.9% to 41.9%

Non-GAAP:
40.0% to 42.0%

OPEX

GAAP:
\$318 to \$333m

Non-GAAP:
\$303 to \$318m

EPS

GAAP:
\$0.79 to \$0.91

Non-GAAP:
\$0.81 to \$0.93

About onsemi

onsemi at a glance

Our Mission

We push innovation to create **intelligent power** and **sensing technologies** that solve the most challenging customer problems

Our employees are inspired to go above and beyond to increase stakeholder value through high quality and high value products and services

Intelligent Power Solutions

Wide Bandgap – SiC, GaN, VGeN

- High efficiency and longer-range – Superior EliteSiC device technology
- High power density and less weight for the most efficient interconnect and direct cooling – Package technology
- Lower cost to deliver same power – Drive switch and SmartFET technologies

Silicon Power – IGBT, FET

- Leading FET and IGBT supplier with growing market share
- Expanding BOM coverage with new products
- Attaching AI data center power in tray, rack and UPS

Analog and Mixed-Signal ICs

- Double down on \$36B¹ TAM with >70% gross margin
- Deliver system-level value with gate drivers and controllers
- Expand leadership to full Power Tree solutions

onsemi Advantage

1

Supply

Best-in-class integrated modules, discrete package solutions and known good die

2

Superior Technology

Die + Package = *THE* most optimal solution on the planet

3

Scale

High-quality, high-volume manufacturing

4

Scope

Suite of sustainable solutions from energy generation to consumption

Intelligent Sensing Solutions

The onsemi Advantage

In-Cabin Solutions

- Driver Monitoring Systems (DMS)
- Occupancy Monitoring Systems (OMS)

Viewing Solutions

- Surround View Systems (SVS)
- Camera Monitoring Systems (CMS, e-mirror)

Vehicle Electrification xEV HEV / PHEV / BEV

- Bi-Directional On-Board Charger
- Traction Inverter
- HV-LV DC-DC Converter

48V Transition

- 48V Starter Generator
- 48V-to-LV DC-DC Converter
- 48V Zonal Modules

Automotive Solutions

ADAS and Autonomous Driving Solutions

- Front Sensing Systems
- Surround Sensing Systems
- Autonomous Parking Assist
- Autonomous Driving

Body Electronics & LED Lighting, Safety and Security

- HVAC
- Body / Zonal Control Module
- Electric Power Steering
- Electronic Braking
- Advanced Lighting Systems
- Tire Pressure Monitoring Systems
- In-Vehicle Networking/Software-Defined Vehicle (10BASE-T1S)

**>500 devices at \$1,600+
per vehicle**

Driving Innovation and Growth in Industrial

AI Data Center: Power Delivery from the Grid to the Core

- onsemi's addressable content increases as power density of AI data center racks increases
- onsemi has the most comprehensive technology portfolio to address increasing power density – Si, SiC FET, SiC JFET, GaN and vGaN, addressing the complete power tree from 0.8V to 800V
- onsemi's unique ability to address both high and low voltages accelerates long-term growth as the AI data center power tree compresses with increasing power density

Transforming Analog & Mixed-Signal Leadership into Sustainable Growth

■ \$36B¹ Addressable Market Across High-Growth Segments

- Automotive (EV, ADAS, zonal architecture)
- Industrial automation
- AI data center power delivery
- Advanced sensing (CGM, positioning, connectivity)
- Aerospace, Defense & Security

■ Industry-Leading Technology

- 65nm BCD process with **1-90V** operating range
- **High-performance analog**, integrated power management
- **Unmatched system integration** across subsystems

■ Accelerated Time-to-Market

- **Spec → Silicon in 6-9 months**
- Centralized, reusable IP library
- Rapid expansion of next-gen product families

■ Proven Momentum & Expansion Roadmap

- Multiple Treo-based products already sampling
- Broad roadmap across power, sensing, communications
- Scalable platform enabling margin-accretive portfolio growth

Vertical GaN: Investable Edge in High Power Density

AI Data Centers

Smaller 800V power converters
→ higher rack compute density
& lower conversion loss

Renewable Energy

Higher-efficiency solar and
wind power conversion
→ better yield per installed watt

Electric Vehicles

Faster charging & smaller,
more efficient inverters
→ range & weight benefits

Aerospace, Defense & Security

Compact, rugged, reliable
power systems for
mission-critical platforms

Breakthrough

GaN-on-GaN vertical current flow delivers higher current density, higher voltage handling and faster switching than silicon and SiC
→ translating to materially higher power density at high frequency.

Manufacturing Excellence

Built on **onsemi** proprietary GaN processes in a 66K sq ft facility in Syracuse, NY with 20K sq ft cleanroom – leads to reduced defects and increased reliability.

Leading in Scale

onsemi is first to scale vertical GaN; 700V/1,200V devices already sampling to early-access customers with volume production targeted for late 2026.

Accelerating Shareholder Value – Non-GAAP

Revenue Growth

- Levered to accelerating demand for power and sensing
- Aligned to secular trends in Automotive, Industrial and AI Data Center

Gross Margin

- Significant gross margin expansion to 53%
- Fab Right: optimize manufacturing network for cost efficiencies. Maximize utilization with flex to external capacity
- Ramping new and differentiated products

Free Cash Flow

- Free Cash Flow margin expansion to 25-30%
- Capital efficiency through high-ROIC investments and working capital management

Shareholder Capital Returns

- Shareholder-friendly capital allocation policy
- Target to return 100% of Free Cash Flow through share repurchase
- \$6.0B share repurchase authorization

Accelerating the Financial Model – Non-GAAP

	2025 Actuals	Long-Term Target	
Revenue	\$6.0B	10-12% CAGR	Grow at ~3x the semiconductor industry
Gross Margin	38.4%	53%	- Mix shift, new products & Treo platform ramp at accretive margins - Optimize cost through Fab Right
Operating Expenses	19.8%	13%	- Invest in R&D for long-term growth - Digital First - embrace new technologies & data analytics
Operating Margin	18.6%	40%	Grow Operating Income faster than Revenue
CapEx	5.7%	Mid-single digit range	- Market success drives investments - High-ROIC brownfield investments
Free Cash Flow	23.7%	25-30%	Target to return 100% of Free Cash Flow through share repurchases

Appendix

Non-GAAP Financial Performance

	2025 Actual	Q1'26 Actual	Q2'26 Actual	Q3'26 Guide	Long-Term Target	
Revenue (\$ millions)	5,995.4	1,513.3	1,603.5	1,650 to 1,750	10-12% CAGR	Q2'26 revenue exceeded the midpoint of guidance
Gross Margin	38.4%	38.5%	39.3%	40.0% to 42.0%	53%	Q2'26 gross margin up 80 bps Q/Q. Fourth consecutive quarter of gross margin expansion
Operating Expenses (\$ millions)	1,185.4	293.7	296.8	303 to 318	13%	Tight cost control with investments in differentiated products – low OPEX growth drives operating leverage
Operating Margin	18.6%	19.1%	20.8%	---	40%	Q2'26 operating margin up 170 bps Q/Q
CapEx (\$ millions)	341.2	21.9	34.3	40 to 50	Mid-single digit range	CapEx intensity target <5%
LTM Free Cash Flow	23.7%	19.5%	24.2%	---	25-30%	Share repurchase target of 100% of FCF
Earnings per Share	\$2.35	\$0.64	\$0.74	\$0.81 to \$0.93	---	Q2 earnings per share grew 4x faster than revenue year-over-year

Q3'26 Guidance

	GAAP	Special Items**	Non-GAAP***
Revenue	\$1,650 to \$1,750 million	-	\$1,650 to \$1,750 million
Gross Margin	39.9% to 41.9%	0.1%	40.0% to 42.0%
Operating Expenses	\$318 to \$333 million	\$15 million	\$303 to \$318 million
Other Income and Expense (including interest), net	(\$18 million)	-	(\$18 million)
Diluted Earnings Per Share	\$0.79 to \$0.91	\$0.02	\$0.81 to \$0.93
Diluted Shares Outstanding *	402 million	7 million	395 million

Notes to Q3'26 Guidance

* Diluted shares outstanding can vary as a result of, among other things, the vesting of restricted stock units, the incremental dilutive shares from the convertible notes, and the repurchase or the issuance of stock or convertible notes or the sale of treasury shares. In periods when the quarterly average stock price per share exceeds \$52.97 for the 0% Notes, \$103.87 for the 0.50% Notes, and \$161.30 for the 2031 0% Notes, the non-GAAP diluted share count and non-GAAP net income per share include the anti-dilutive impact of the hedge transactions entered concurrently with the 0% Notes, the 0.50% Notes, and the 2031 0% Notes, respectively. At an average stock price per share between \$52.97 and \$74.34 for the 0% Notes, \$103.87 and \$156.78 for the 0.50% Notes, and \$161.30 and \$211.54 for the 2031 0% Notes, the hedging activity offsets the potentially dilutive effect of the 0% Notes, the 0.50% Notes, and the 2031 0% Notes, respectively. In periods when the quarterly average stock price exceeds \$74.34 for the 0% Notes, \$156.78 for the 0.50% Notes, and \$211.54 for the 2031 0% Notes, the dilutive impact of the warrants issued concurrently with such notes is included in the diluted shares outstanding. GAAP and non-GAAP diluted share counts are based on either the previous quarter's average stock price or the stock price as of the last day of the previous quarter, whichever is higher.

** Special items may include: amortization of acquisition-related intangibles; expensing of appraised inventory fair market value step-up; restructuring-related cost of revenue charges; non-recurring facility costs; in-process research and development expenses; restructuring, asset impairments and other, net; goodwill impairment charges; gains and losses on debt prepayment; actuarial (gains) losses on pension plans and other pension benefits; and certain other special items, as necessary. These special items are out of our control and could change significantly from period to period. As a result, we are not able to reasonably estimate and separately present the individual impact or probable significance of these special items, and we are similarly unable to provide a reconciliation of the non-GAAP measures. The reconciliation that is unavailable would include a forward-looking income statement, balance sheet and statement of cash flows in accordance with GAAP. For this reason, we use a projected range of the aggregate amount of special items in order to calculate our projected non-GAAP operating expense outlook.

*** We believe these non-GAAP measures provide important supplemental information to investors. We use these measures, together with GAAP measures, for internal managerial purposes and as a means to evaluate period-to-period comparisons. However, we do not, and you should not, rely on non-GAAP financial measures alone as measures of our performance. We believe that non-GAAP financial measures reflect an additional way of viewing aspects of our operations that, when taken together with GAAP results and the reconciliations to corresponding GAAP financial measures that we also provide in our releases, provide a more complete understanding of factors and trends affecting our business. Because non-GAAP financial measures are not standardized, it may not be possible to compare these financial measures with other companies' non-GAAP financial measures, even if they have similar names.
