

Powering a Smarter World

September 16, 2026

Cautionary Note Regarding Forward-Looking Statements

This communication relates to a proposed business combination transaction between Synaptics Incorporated (“Synaptics”) and ON Semiconductor Corporation (“onsemi”). This communication includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of historical facts, included or incorporated in this communication could be deemed forward-looking statements, particularly statements about future financial performance and forward-looking financial guidance. These forward-looking statements are based on Synaptics’ and onsemi’s current expectations, estimates and projections about the expected date of closing of the proposed transaction and the potential benefits thereof, their respective businesses and industries, management’s beliefs and certain assumptions made by Synaptics and onsemi, all of which are subject to change. Some of these forward-looking statements can be identified by the use of forward-looking words such as “believes,” “expects,” “may,” “will,” “should,” “seeks,” “approximately,” “intends,” “plans,” “estimates,” “projects,” “strategy,” “anticipates,” or “Target,” or the negative of those words; other comparable terminology that convey uncertainty of future events or outcomes; or by discussions of strategy, plans, projections or intentions.

These forward-looking statements involve known and unknown risks and uncertainties, which may cause Synaptics’ or onsemi’s actual results and performance to be materially different from those expressed or implied in the forward-looking statements. Factors and risks that may impact future results and performance include, but are not limited to, the following factors: (1) the risk that the conditions to the closing of the transaction are not satisfied, including the risk that required approvals from regulators or the stockholders of Synaptics for the transaction are not obtained; (2) litigation relating to the transaction; (3) uncertainties as to the timing of the consummation of the transaction and the ability of each party to consummate the transaction; (4) risks that the proposed transaction disrupts the current plans and operations of Synaptics or onsemi, including restrictions during the pendency of the transaction that may impact the ability to pursue certain business opportunities or strategic transactions; (5) the ability of Synaptics and onsemi to retain and hire key personnel; (6) competitive responses to the proposed transaction; (7) unexpected costs, charges or expenses resulting from the transaction; (8) potential adverse reactions or changes to business relationships resulting from the announcement or completion of the transaction; (9) the combined companies’ ability to achieve the growth prospects and synergies expected from the transaction, as well as delays, challenges and expenses associated with integrating the combined companies’ existing businesses; (10) uncertainty as to the long-term value of onsemi’s common stock; (11) legislative, regulatory and economic developments; and (12) unpredictability and severity of catastrophic events, including, but not limited to, acts of terrorism or outbreak of war or hostilities, as well as Synaptics’ and onsemi’s response to any of the aforementioned factors. These risks, as well as other risks associated with the proposed transaction, are more fully discussed in the proxy statement/prospectus that is included in the Registration Statement on Form S-4 that has been filed with the Securities and Exchange Commission (“SEC”) in connection with the proposed transaction. While the list of factors presented here is considered representative, no such list should be considered to be a complete statement of all potential risks and uncertainties. Unlisted factors may present significant additional obstacles to the realization of forward-looking statements.

In addition, actual results are subject to other risks and uncertainties that relate more broadly to Synaptics’ overall business, including those more fully described in Synaptics’ filings with the SEC including its annual report on Form 10-K for the fiscal year ended June 27, 2026, and its quarterly reports filed on Form 10-Q for the current fiscal year, and onsemi’s overall business and financial condition, including those more fully described in onsemi’s filings with the SEC including its annual report on Form 10-K for the fiscal year ended December 31, 2025, and its quarterly reports filed on Form 10-Q for its current fiscal year.

Investing in onsemi’s or Synaptics’ securities involves a high degree of risk and uncertainty, and readers should carefully consider the trends, risks, and uncertainties described in this communication and other SEC filings of onsemi and Synaptics (including those referenced above) before making any investment decision. If any of these trends, risks, or uncertainties actually occurs or continues, the business, financial condition, or operating results of either or both companies could be materially adversely affected, the trading prices of each company’s securities could decline, and investors could lose all or part of their investment. Forward-looking statements are not guarantees of performance, and speak only as of the date made, and neither onsemi, nor Synaptics nor the management of either entity undertakes any obligation to update or revise any forward-looking statements, except as may be required by law. All forward-looking statements attributable to onsemi, Synaptics, or persons acting on behalf of either company are expressly qualified in their entirety by this cautionary statement.

This is not an offer or solicitation. For additional information, please reference slides 36 – 37.

Use of Non-GAAP Financial Measures

This presentation contains historical non-GAAP financial measures including, among others, free cash flow (FCF) and FCF margin, non-GAAP gross margin and non-GAAP operating margin. This presentation also contains forward looking non-GAAP financial measures, some of which are adjusted for certain special items. These special items are out of our control and could change significantly from period to period. As a result, we are not able to reasonably estimate and separately present the individual impact of these special items, and we are similarly unable to provide a reconciliation of the non-GAAP measures. The reconciliation that is unavailable would include a forward-looking income statement, balance sheet, and statement of cash flows prepared in accordance with GAAP. We believe these non-GAAP measures provide important supplemental information to investors. We use these measures, together with GAAP measures, for internal managerial purposes and as a means to evaluate period-to-period comparisons. However, we do not, and you should not, rely on non-GAAP financial measures alone as measures of our performance. In addition, because non-GAAP financial measures are not standardized, it may not be possible to compare these financial measures with other companies' non-GAAP financial measures, even if they have similar names.

For a reconciliation of historical non-GAAP financial measures to GAAP, please see the Appendix on slide 29.

Charting a Path to Power the Next Decade of Innovation

Hassane El-Khoury
President and CEO

Every foundational technology
eventually encounters a physical limit

We've reached it.

onsemi[®]

© onsemi 2026 | Public Information

A Foundational Technology Is Not an Invention... onsemi

IT'S A LAYER

It's not the product

Three Signatures of a Foundational Technology

1  WIDESPREAD IMPACT

2  CONTINUOUS IMPROVEMENT

3  FOUNDATIONAL DEPENDENCY

A force multiplier...
...for human progress.

It's the foundation

Foundational Technology Layer:
Disruptor across all markets

 Automotive  Industrial  AI  Consumer

 EXPANDS POSSIBILITY

 ELEVATES QUALITY OF LIFE

 ENABLES SUSTAINABILITY

 UNLOCKS THE NEXT FRONTIER

The Future is Arriving Faster Than Ever

onsemi

Every Foundational Technology Was Gated By A Physical Constraint

Physical Constraint Ladder

Each constraint sits deeper in the system. **Each is harder to move.**

MORE PHYSICAL

Until power density breaks through, the AI revolution is limited

More Power Isn't Enough. The World Needs Better Power.

onsemi

YESTERDAY: POWER SUPPORTED WORK

Factories

Predictable
operations

Appliances

Intermittent
usage

Buildings

Managed
consumption

**Conventional
Vehicles**

Mechanical
systems

Power was relatively predictable
and tolerant of inefficiency

THE CHALLENGE HAS CHANGED

POWER MUST BE

More
Efficient

More
Dense

More
Reliable

More
Precise

More
Autonomous

More
Scalable

TOMORROW: POWER ENABLES INTELLIGENCE

INTELLIGENCE

AI Data Centers

Robotics & Humanoids

Autonomous Vehicles

Smart Infrastructure

Smart Factories

Edge AI Systems

**Power is always on, always
connected, always at peak, and
critical to performance**

WE SOLVED THE POWER OF YESTERDAY

ELECTRICAL (COMPONENTS)

More watts → Bigger → Centralized

Electrical

Convert, control
and distribute
power efficiently

Thermal

Move heat
before it limits
performance

Mechanical

Withstand
stress and
enable reliability

Physical

Design within
the limits of
physics

POWER OF TODAY

MULTI-PHYSICS SYSTEMS

More watts → Smaller → Distributed

MORE POWER. LESS SPACE. HIGHER EFFICIENCY. UNMATCHED RELIABILITY.

⚡ WE SOLVED POWER

NOW WE SOLVE POWER DENSITY

System Requirements are Moving in Opposite Directions

What the customer asks for

- ▲ **Input voltage** Increasing
- ▼ **Output voltage** Decreasing
- ▲ **Power** Increasing
- ▼ **Physical space** Constrained
- ◆ **Cost** Always challenged

Electrical + Thermal + Mechanical + Physical
Nothing on the market closes all at once

And the problems only get harder across end markets and applications

AI Data Center

800V and higher → 6V or less

Industrial: Solid-State Transformer

13.8kV → 34.5kV

Automotive: xEV

400V → 900V+

The Constraint has Changed. So did we.

onsemi

FROM SOLVING POWER

Efficiency • Conversion • Components • Scale

Power density is not
solved by one device

It requires a
different company

TO SOLVING POWER DENSITY

Electrical • Thermal • Mechanical • Physical

onsemi

onsemi is a fundamentally different company
for a fundamentally different problem: **Power Density**

Cautionary Information

No Offer or Solicitation

This communication is for informational purposes only and does not constitute, or form a part of, an offer to buy or sell or the solicitation of an offer to buy or sell any securities, or a solicitation of any vote or approval, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offer of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Important Additional Information about the Transaction and Where To Find It

The proposed transaction will be submitted to the stockholders of Synaptics for their consideration. In connection with the proposed transaction, on August 21, 2026, onsemi filed with the SEC a Registration Statement on Form S-4 that included a proxy statement of Synaptics and that also constituted a prospectus of onsemi. Each of Synaptics and onsemi will provide the proxy statement/prospectus to Synaptics stockholders. These materials are not yet final and will be amended. Synaptics and onsemi also plan to file other documents with the SEC regarding the proposed transaction. This document is not a substitute for any prospectus, proxy statement or any other document which Synaptics or onsemi may file with the SEC in connection with the proposed transaction. INVESTORS AND SECURITY HOLDERS ARE URGED TO READ THE PROXY STATEMENT/PROSPECTUS AND ANY OTHER RELEVANT DOCUMENTS THAT WILL BE FILED WITH THE SEC CAREFULLY AND IN THEIR ENTIRETY WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION ABOUT THE PROPOSED TRANSACTION. You may obtain copies of all documents filed with the SEC regarding this transaction, free of charge, at the SEC's website (www.sec.gov). In addition, investors and stockholders will be able to obtain free copies of the proxy statement/prospectus and other documents filed with the SEC by the parties on Synaptics Investor Relations at <https://investor.synaptics.com/> (for documents filed with the SEC by Synaptics) or onsemi Investor Relations at <https://investor.onsemi.com/> (for documents filed with the SEC by onsemi).

Cautionary Information

Participants in the Solicitation

Synaptics, onsemi, and certain of their respective directors, executive officers and other members of management and employees, under SEC rules may be deemed to be participants in the solicitation of proxies from Synaptics stockholders in connection with the proposed transaction. Information regarding the persons who may, under the rules of the SEC, be deemed participants in the solicitation of Synaptics stockholders in connection with the proposed transaction, and a description of their direct and indirect interests, by security holdings or otherwise, will be set forth in the proxy statement/prospectus that will be provided to Synaptics stockholders. You can find more detailed information about Synaptics' executive officers and directors under the headings "Proposal 1 – Election of Directors," "Director Compensation," "Compensation Discussion and Analysis," "Named Executive Officer Compensation Tables," "CEO Pay Ratio Disclosure," "Pay Versus Performance Disclosure" and "Beneficial Ownership of Certain Stockholders" in its definitive proxy statement filed with the SEC on September 16, 2025. To the extent holdings of Synaptics common stock by the directors and executive officers of Synaptics have changed from the amounts of Synaptics common stock held by such persons as reflected therein, such changes have been or will be reflected on Statements of Change in Ownership on Form 4 filed with the SEC, which are available at <https://www.sec.gov/edgar/browse/?CIK=817720&owner=exclude> under the tab "Ownership Disclosures". You can find more detailed information about onsemi's executive officers and directors under the headings "The Board of Directors and Corporate Governance," "Compensation of Executive Officers" and "Stock Ownership" in its definitive proxy statement filed with the SEC on April 2, 2026. To the extent holdings of onsemi common stock by the directors and executive officers of onsemi have changed from the amounts of onsemi common stock held by such persons as reflected therein, such changes have been or will be reflected on Statements of Change in Ownership on Form 4 filed with the SEC, which are available at <https://www.sec.gov/edgar/browse/?CIK=1097864&owner=exclude> under the tab "Ownership Disclosures". Additional information about Synaptics' executive officers and directors and onsemi's executive officers and directors can be found in the above-referenced Registration Statement on Form S-4.
